Course Objective: To gain understanding of and skill at doing logic design of digital systems.

Required Materials: MIL-STD806C Logic Symbol Template, Halfsize, (e.g., Pickett 1222, Rapid Design RPD-R-542, or equivalent).

Grading: Exam I (about class 13: Mon., Mar. 9) 27.5%
Exam II (about class 23: Mon., Apr. 20) 27.5%
Final Exam (firm date: Sat., May 16, 8:00 – 10:00 a.m.) 35%
Homework, unannounced quizzes, & instructor’s subjective impression of class participation 10%

Exams are closed book, closed notes & no electronic devices such as calculators, PDAs, etc.; Homework will be collected & marked. Letter grades are based on higher of raw or scaled semester average.

- If your final exam score is higher than your lowest score on Exam I or Exam II, then the final exam score will replace that lowest score in computation of your semester average.
- No midterm makeup exams will be given for any reason. If you must miss an exam, you must first get permission from Professor Silio before the exam, and the final exam score will count for that portion of the grade. This will count as your one replacement.
- The University policy on the number of final exams a student must take on one day is no more than three. Students are strongly encouraged to check the final exam schedule before registering for courses to avoid four or more finals on the same day.

Topical Outline: (Subject to revision by instructor) (Ch. = Chapter, S = Section(s))

1. Binary Numbers; binary arithmetic and codes (Ch. 2, S: 2.1–2.11)
2. Boolean Algebra, switching algebra, and logic gates (Ch. 3, S:3.1–3.8, & Silio Notes)
3. Karnaugh Maps, simplification of Boolean functions (Ch. 4, S: 4.1–4.7)
4. Combinational Design/Analysis; two level NAND/NOR implementation; & multilevel NAND/NOR/XOR circuits (Ch. 3, S: 3.9–3.10)
5. Tabular Minimization (Quine McCluskey) (Ch. 4, S: 4.8–4.9, 4.9.2, 4.10–4.13.3, 4.13.5–4.13.6)
6. Exam I (Exact date will be announced in class.)
7. Adders, subtracters, BCD adders, code converters, parity checkers. (Ch. 5, S: 5.1–5.2)
8. MSI Components, design and use of comparators, encoders, decoders, & multiplexers (Ch. 5, S: 5.3–5.6.1)
9. Latches and flip-flops (Ch. 6, S: 6.1–6.6)
10. Synchronous sequential circuit design & analysis (Ch. 7, S: 7.1–7.3 & 7.6)
11. Registers, synchronous and asynchronous counters (Ch. 6, S: 6.7–6.9)
12. Exam II (Exact date will be announced in class.)
13. Programmable Logic, ROMs, PLDs, PLAs, PALs (Ch. 5, S: 5.7–5.10 & Ch. 7, S: 7.6.1)
15. Final Exam (Firm date; see “Grading” section above.)

Optional Topics as time permits:
1. State Reduction and Good State Variable Assignments (Ch. 7, S: 7.4–7.5)
2. Algorithmic State Machine (ASM) Charts (Ch. 8)
3. Asynchronous sequential circuits (Ch. 9)

My office hours (for now at least) are: Mon. 2:00 – 4:00 p.m. & Wed. 1:00 – 3:00 p.m.
in room number: AVW-1329
Other times by appointment.
(Continued)
• If you have problems with my office hours and need to see me you can make an appointment.
   My phone number is 301-405-3668, and my home number is 301-937-7418 in case you need
   to reach me there.
• If you have a documented disability and wish to discuss academic accommodations with me,
   please contact me as soon as possible and not later than Monday, February 9.
• If any exam (especially the final exam) is scheduled on a religious holiday that you are
   compelled to observe, and you must make arrangements to take the exam on a different date,
   please see me about making these arrangements not later than Mon., Feb. 9. NOTE: the final exam
   scheduled by the University is on a Saturday; if you have a problem with this, one way to avoid
   this problem is to immediately change your registration to one of the 020k sections.

Homework and Grading Policies
• There will be approximately 12 homework assignments during the semester. Homework is due
  at the beginning of class on the date indicated. No late homework will be accepted
  for any reason.
• Do homework on 8.5 × 11 inch paper with problems in the order of assignment. Label the
  first page in the upper right hand corner with your full name, course number
  (ENEE244), recitation (i.e., discussion) section number, recitation instructor’s
  name, and homework assignment number. Staple the pages in the upper lefthand
  corner, and do not fold them. It is important that you memorize and know at all times
  your recitation section number!
• If you dispute your grade on any homework or exam, you have one week from the date the
  paper was returned to request a change in grade. After this time, no change in grade will
  be considered. All requests for a change in grade must be submitted in writing to Professor
  Silio through your recitation section instructor, who will first examine your request and make
  a recommendation. A request for change in grade must be labeled in the same manner
  as a homework assignment with name, course number, recitation section number, and
  recitation instructor’s name.
• It is important that you do the homework in order to understand the material in the course.
  While it is perfectly reasonable to discuss your approach to solving the problems with a friend,
  the final writeup of the solution should be your own work and not a copy of your friend’s
  solution.
• Typically, graded homeworks will be returned one week after they are collected. Since it is not
  possible in finite time for TAs to mark all assigned problems in detail in assigning a homework
  score, solutions will be made available for each homework assignment and you should go over
  them in detail yourself to correct any errors you may have made that were not caught in
  the marking process. The last homework assignment collected before an exam might not be
  returned before the exam date. Therefore, you might want to retain a photocopy of your
  homework solution to study for the exam.
• It is your responsibility to pick up handouts, solutions, and homework assignments when they are
  passed out in class. Professor Silio will not retain copies after the class in which the handout
  is passed out. If you must miss class, make arrangements with a reliable classmate to pick
  up a copy of the handout material for you; or make arrangements with other classmates to
  photocopy theirs.
• A course ftp web site will be maintained in AFS directory:
  /afs/glue.umd.edu/department/enee/public_html/courses/enee244.S2009
  (URL http://www.ece.umd.edu/courses/enee244 under Spring 2009), which contains
  information Notes and Homework. If you miss class, you may be able to find the missed
  handout here in pdf format.

(Continued)
Recitations
• During recitations your TA will go over solutions to selected homework problems. In addition, recitations provide you with an opportunity to ask clarifying questions regarding material or concepts presented in lecture.
• The style of the recitations will be rather interactive, so your participation is both encouraged and important.

Reminder about Academic Integrity
• Academic dishonesty will not be tolerated. The University Code of Academic Integrity, which can be found at http://www.inform.umd.edu/CampusInfo/Departments/JPO/ prohibits students from committing the following acts of academic dishonesty: cheating, fabrication, facilitating academic dishonesty, and plagiarism. Academic dishonesty in this class includes outright copying on homework; however, discussing homework problems and exchanging tips is permissible and also encouraged. If there are any take-home exams, discussing the material with anyone other than privately with the instructor, inside or outside of the class, is considered academic dishonesty. Instances of academic dishonesty will be referred to the Office of Judicial Programs.

Recommended Study Habits
• Read the specified sections of the book before class.
• Attend lecture and take written notes.
• After lecture recopy your notes, and study the reading assignment.
• Start on the homework problems early and take advantage of office hours.
• Regularly devote 13 hours per week to reading, homework, exam prep, lectures and recitation.
• Do not fall behind!
