ENEE 380H
Fall Semester 2000

Time and Room: TuTh 9:30 - 10:45 am, CSS 2316
Discussion: Section 0101 W 9:00 - 9:50 am, EGR 1108
Instructor: Prof. Christopher C. Davis
Office: 2401 A.V. Williams Building, Telephone 405-3637, FAX 314-9281
e-mail: davis@eng.umd.edu
http://www.ece.umd.edu/~davis

Office hours TuTh 1:30 - 3:00 pm, by appointment, and when I am available.

The T.A. for this class is A.A. Cardenas (acardena@eng.umd.edu), his office hours are to be determined.

I hope to cover Chapters 1-7.

Examinations and Grading

There will be three 50 minute examinations in class during the semester. The first will be a quiz on vectors to be held on Tuesday, September 12. This examination only counts for 5% of your grade. The times of the two other examinations will be arranged later. Each of these examinations counts for 20% of the final grade.

The final examination is in class on Monday, December 18, 1999 from 10:30am - 12:30pm and counts for 40% of the final grade.

All examinations will be “closed-book”

Anyone who misses an examination for a valid reason will be permitted to take a cumulative makeup examination just before the final examination.

Students with special needs or documented disabilities should contact me to discuss accommodations.

Homework will be assigned and graded. It counts for 15% of the final grade but will be an important factor in determining grade in borderline cases. You are strongly encouraged to complete all the homeworks because this will help you to understand the course material. Also, there will be questions on the examinations that may be identical to some homework problems.

Computer Use

Students are encouraged to use Mathcad, Matlab, Mathematica, or any other useful tools to solve homework problems.
