

ENEE 610, Fall 2007
Information for second presentations

1. At the beginning of the presentation every Presenter should have a hand-out of one page (19 copies). These will be graded as part of the base paper grade and should include the main circuit under study, key equations, key results obtained or expected, and points of the presentation in bullet form.

Presentations should be in Power Point for which the computer in the classroom accommodates USB flash or CDs.

2. At the end of the presentation the Commentator should ask three questions as well as comment on anything pertinent to the meaning and understanding of the concepts of the paper. One copy of the points raised should be handed in no later than the following period.

These too will be graded primarily as to depth of concept.
