

ENEE 610 - Fall 2019 Term Paper Description

The term paper should have a thorough discussion of your base paper and

1. Be no longer than 10 pages (1.5 space, 12 point)
2. Follow the structure of an IEEE transactions' paper (need not be two columns)
3. Contain the base circuit/system and **your** main simulation and results in the body.
4. Give historical context and the theory with analytic treatment of operation of the circuit/system as well as a discussion with open problems.
5. Have a good background reference set with full reference data for ease of access.
6. Appendices to any reasonable length are allowed.
