

ENEE434 Spring 2003 Midterm Exam Study Points

1. The midterm exam will be Thursday March 20, 2003
2. It will be open book, open notes, worth 100 points.
3. We anticipate it to have three problems including the concepts:
 - a. Perceptron - classify 2-vectors with a single neuron.
 - b. Hopfield network - set up weights and show it works for 3-vectors
 - c. Backpropagation - find weights for a two layer network given a training set.
