- Grader:
6. Course Description: Paper presentations at meetings held once a week at the scheduled time.
7. Course Operation:
 - Each student will present a talk on a paper in the literature, possibly on a central theme if the class so decides. For 2 credits two talks on related papers should be given and a short written summary of them submitted. For 3 credits two talks and a term paper on the topic of the papers should be written following IEEE guidelines.
 - Each student will also be a commentator (for the number of talks given) on other papers.
 - The talks should be prepared into Powerpoint.
 - For those interested, VLSI layout is possible with fabrication via MOSIS (actual fabrication will require a commitment to make measurements on the chip, for which the Microelectronics Design Laboratory annex, Rm AVW 1364, can be made available).
